

Church Music

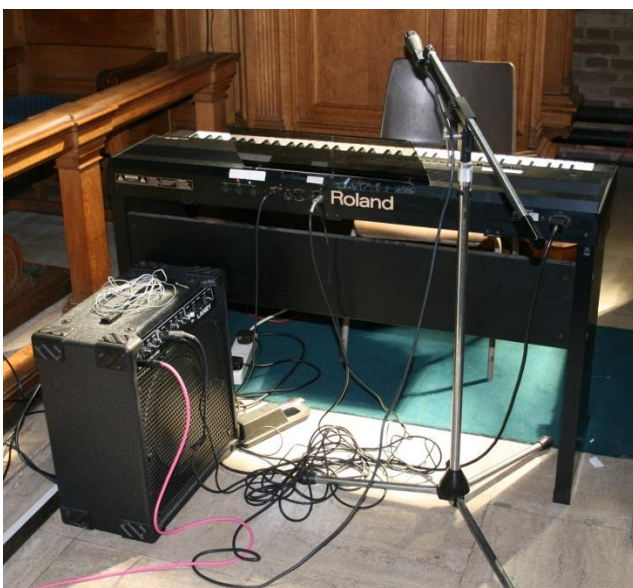

heritage learning welcome

This is an organ, a traditional church instrument. It has two keyboards, but also foot pedals and stop buttons. Can you see the big pipes for the sound to come out of? The organ makes a big, loud, grand sound.

Many churches use a modern keyboard or electric piano – instead or as well as the organ. The singers use microphones, and often drums are used too.

Can you name all the instruments used in this Christmas service band?
